

SOP-LOG-01: Standard Logistics Delivery & Proof of Delivery Procedure

SOP-LOG-01: Standard Logistics Delivery & Proof of Delivery Procedure

1. Overview

This procedure establishes standard operating protocols for routine commercial and industrial freight deliveries.

2. Arrival & Dock Check-In

1. Gate Check-In: Driver presents Commercial Driver License (CDL), Bill of Lading (BOL), and shipment code (e.g. SHP-1001).
2. Dock Assignment: Driver maneuvers vehicle into designated bay, engages parking brake, chocks wheels, and turns off engine.
3. Container Seal Inspection: Verify that the high-security bolt seal matches the BOL serial number before cutting the seal.

3. Electronic Proof of Delivery (e-POD)

- All deliveries require electronic Proof of Delivery (e-POD) captured via the LogiAgent mobile terminal.
- Required e-POD fields:
 - Legible recipient signature and printed full name.
 - Recipient employee badge / ID number.
 - High-resolution photograph of delivered pallets at receiving dock.
 - Automated GPS geotag and UTC delivery timestamp.

SOP-LOG-01: Standard Logistics Delivery & Proof of Delivery Procedure

4. Damaged Cargo & Shortage Exceptions

Visible Damage Protocol

- If exterior carton or pallet damage is observed during unloading:
 1. Halt unloading immediately and notify the receiver facility supervisor.
 2. Take minimum 4 high-resolution photos showing package damage, orientation arrows, and pallet tags.
 3. Mark specific damaged quantity on BOL with status 'Damaged on Arrival'.
 4. Obtain countersignature from dock manager before departing.

Shortages and Overage

- Any piece count discrepancy must be recorded on the digital manifest immediately.
- Driver must not depart dock until Central Dispatch logs the discrepancy exception code.
